Campus Management System

CMS

ERP System for Universities, Colleges and Educational Institutions

JAYCEETECH

What is CMS

Createch's **Campus Management System (CMS)** is an Enterprise Resource Planning System (ERP) software applications act as the central company-wide information system. ERP systems integrate all of an organization's departments, divisions, lines of business and geographical locations into a single, shared, unified and enterprise wide information system. The University is an "enterprise" and an ERP solution integrates all functions student information, human resources, and financial systems into one administrative system.

Benefits of CMS

- Centralized Web Based System
- Availability of Real-time Business Information at all levels.
- Consistent & highly Secured System.
- Provides Effective Decision Support System (DSS) that helps in Timely Decision Making.
- Ensures Better Coordination and Workflow Between Various Departments.
- Faster and Automatic Report Generation.
- Helps in Reducing Paperwork and Manual Filing and Record Keeping
- Productivity Enhancement for Staff as Well as Students Due to Instant Availability of Critical Information.
- e-Governance of educational institutions

Product Overview

Createch's **Campus Management System (CMS)** is web based software for effective management of administrative and educational organization management functions that are necessary to successfully handle all of the challenges of running an educational institution.

CMS provides real time information processing and knowledge management. It is an integrated solution that facilitates the processing and maintenance of large volumes of information - including student, faculty, inventory, asset management, facility management, transport, library, staff details, and payroll and student fees among various departments in an institution.

CMS practically covers the entire area of operations and automation of the university and colleges. The system not only helps in daily operations of the university/educational institution, but also provides the foundation to foster research and development on e-learning methodologies. CMS is powered with user-friendly reports and user-interface thereby ensuring maximum user efficiency. The main focus area in is on the integration of learning management system, research and Extension of education and university administration.

CMS include core modules like, Academics and Examination, Financial Accounting, HRMS, Research and extension education, Veterinary hospital management and Project Planning and Monitoring, along with the administrative modules File movement system, Letter I/O movement, stores and purchase and Asset management.
