

### Overview

Government and various other agencies provide funds to organizations, institutes or individuals, spearheading projects supporting public welfare, research or technical innovations. The onus lies with the fund utilizers to ensure that funds are used for specific cause and objective.

In current state, the manual processing of increasing number of grants is mounting pressure on the receiving organization. The longer review cycles and lack of collaboration across departments, results in delayed fund utilization. To gain efficient control and ensure timely utilization of funds, there is a need to streamline the complete funding lifecycle from receiving grant to monitoring work post-award.

### Challenges

- Inadequate monitoring systems
- Bulk processing of projects for utilization of grant
- Longer review and delayed approval cycle
- Lack of transparency, necessary evaluation rules and checklists
- Delay in fund utilization due to delayed information access
- Collaboration across departments

## **Jayceetech Solution for Fund Management**

Fund Management System helps manage funds from under- or over-utilized or mismanaged. Jayceetech's web based and collaborative Fund Management Solution is based on the Case Management Framework. Our solution standardizes, streamlines and automates the complete funds lifecycle. The solution optimizes time, effort and cost by applying the built-in rules for managing the complete life cycle from receiving grant and managing time sensitive disbursements for different projects to directly communicating with applicant and authorities for planning the future funding

### **Product Features**

- ✓ Fund Registers (Receive funds)
- ✓ Management of Project Details
- ✓ Management of Cheque Register
- ✓ Management of Cash Register
- ✓ Advance Register
- ✓ Disbursement/ Expenditure State
- ✓ Subsidiary Receipt & Disbursement
- ✓ Local Purchase of Items
- ✓ Manage Roles & privileges to users/Role Based access
- ✓ Online Work Order
- ✓ Project Administration
- ✓ Project Details Capturing
- ✓ Project Milestones Management
- ✓ Purchase/Supply Order
- ✓ R&R Modifiable
- ✓ Repair/Modification/Upgradation details
- ✓ Repairing of Items
- ✓ Sanction Details
- ✓ Serviceability Status of Equipment
- ✓ Stock Ledger Generation
- ✓ User Management
- ✓ Vendor List
- ✓ Contingency / Advances
- ✓ Contingency Advance Adjustment Details
